Kolkata, India | +91 9748691709 | jitendrasethia053@gmail.com | [linkedin](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Third-year Software Engineering student and former Chief Marketing Officer at Tathagata Sengupta Ventures, with hands-on experience delivering real-world IT consultancy projects including custom websites, admin dashboards, and client-focused digital solutions. Proven leadership in managing marketing and development teams, working with 10+ clients during internship projects, and coordinating scalable web and AI-powered systems in high-pressure hackathon environments. Skilled in Java, C, Python, MySQL, React.js, Node.js, and modern GenAI/Agentic AI technologies. Passionate about backend systems, full-stack development, and AI innovation, seeking software engineering or AI/ML roles to build impactful, scalable products.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, SQL

Frontend Technologies: React.js, HTML, CSS, Responsive Web Design

Backend Technologies: Node.js, RESTful API Development, Database Design, Admin Dashboard Development, Authentication Systems (OTP-based login integration)

AI/ML Technologies: Machine Learning Fundamentals, Generative AI (GenAI), Agentic AI Concepts, AI-assisted Automation Projects

Development Tools: Git & Version Control, PyCharm, VS Code, Postman, Deployment on Vercel/Hosting Platforms

Core Competencies: Full-Stack Development, Backend System Design, Client Requirement Analysis (10+ client interactions), Team Leadership & Coordination, Hackathon Problem Solving, Agile Methodologies, Research & Development

EDUCATION

Bachelor of Technology – Computer Science and Engineering

Techno International Newtown, Kolkata, India | Expected Graduation: 2027

Higher Secondary Education (XII) – Pearls Of God

PROFESSIONAL EXPERIENCE

Web Developer – Independent Projects

Built Jain Consultancy website with OTP verification, WhatsApp/email automation, and backend form systems. Currently developing AI platforms GramLink AI and FarmLink AI.

Ex-CMO – Tathagata Sengupta Ventures

Managed marketing team operations, lead generation, and growth initiatives.

HACKATHON PROJECTS & ACHIEVEMENTS

Smart India Hackathon 2025 – FINALIST (Hardware Category)

Project: MiningMotors_T72 – Suryadut Solar De-watering System

- Led cross-functional team in designing and developing an innovative solar-powered water removal system for mining operations, reducing dependency on diesel-based systems by leveraging renewable energy.
- Managed project planning, technical execution, stakeholder coordination, and final presentation to secure national finalist position among thousands of competing teams.

EIBS 2025 –(Software Category)

Lead Developer / Tech: WeilChain, Web Development, Smart Contracts/ Project: Bond Buy – Blockchain-Based Bond Tokenization Platform

- **Fractional Investment Engine:** Engineered a platform on **WeilChain** to tokenize government bonds, enabling small-capital investors to purchase fractional shares and lowering the barrier to entry for high-value government assets.
- **Automated SIP Infrastructure:** Developed a unique **Systematic Investment Plan (SIP)** feature allowing users to automate monthly, quarterly, or yearly bond purchases with flexible controls to pause, resume, or modify investment flows.

AI FOR BHARAT 2025- (on-going)

Lead Developer / Project: GramLink AI– Multilingual Government Scheme Assistant

- **Multilingual Scheme Intelligence Engine:** Engineered an AI-powered platform that analyzes user details and matches them with eligible government schemes using NLP and rule-based filtering, enabling rural citizens to discover benefits in their native language.
- **Automated Eligibility & Document Guidance:** Built an intelligent eligibility checker and step-by-step document assistance module, guiding users through application requirements and reducing confusion in complex government processes.
- **Voice & Text Interaction System:** Developed voice-enabled and text-based AI interface supporting multilingual communication, simplifying scheme access for users with low digital literacy and improving accessibility across rural regions.

LEADERSHIP & PROFESSIONAL SKILLS

Team Leadership & Cross-Team Coordination • Client Communication & Requirement Analysis • Technical Communication & Presentation Skills • Analytical Problem Solving in Hackathon Environments • Agile Collaboration with Development & Marketing Teams • Research & Innovation in AI/Blockchain Projects • Adaptability in Fast-Paced Startup & Hackathon Settings • Full-stack Developer

PROFESSIONAL INTERESTS

AI for Social Impact & Agentic AI Systems (Projects like GramLink AI) • Full-Stack Web & Backend Development for Real Client Solutions • Building Scalable Digital Products & Startup Ideas (BazaarBot IoT Vending Concept) • Competitive Hackathons & Innovation Challenges • Open-Source Learning & Research in Blockchain and AI • Software Engineering for Real-World Problem Solving • Music & Rhythm Instruments as a Creative Passion
