SUMMARY

Final-year B.Tech CSE student with 2+ years of freelance experience shipping production backend systems and automation for clients in India and Australia. Strong in data structures, algorithms, and CS fundamentals; builds reliable services in Python, TypeScript, and Node.js with PostgreSQL. SIH 2025 National Finalist (team lead, top 0.1% of 50,000+ teams).

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C, SQL

Data Structures & Algorithms: Arrays, Strings, Hashing, Linked Lists, Stacks & Queues, Trees & BST, Heaps, Tries, Graphs (BFS/DFS, Dijkstra, Topological Sort, Union-Find), Dynamic Programming, Greedy, Binary Search, Two Pointers & Sliding Window, Recursion & Backtracking, Bit Manipulation, Time/Space Complexity Analysis

CS Fundamentals: OOP & Design Patterns, DBMS (normalisation, indexing, ACID transactions), Operating Systems (processes/threads, concurrency, memory management), Computer Networks (TCP/IP, HTTP), System Design basics (caching, queues, idempotency)

Backend: FastAPI, Flask, Node.js, Express, Fastify, Next.js, REST API design, OAuth 2.0, WebSockets (Socket.IO), BullMQ, SQLAlchemy, Prisma

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite, schema design, migrations, vector databases

Frontend: React.js, Next.js, Redux Toolkit, React Native (Expo), Tailwind CSS

DevOps & Tools: Docker, Git/GitHub, GitHub Actions CI, Linux, OpenTelemetry, Prometheus, Vercel, Render

AI & Automation: OpenAI/Anthropic/Gemini APIs, LangChain, LangGraph, RAG, tool-calling agents, n8n, Make.com, GoHighLevel, Twilio, VAPI

EXPERIENCE

Freelance Software & Automation Engineer(2024 – Present)

Independent projects and collaborations with agencies

- Architected an unattended content pipeline producing 300+ videos/month (OpenAI → ElevenLabs → Creatomate → Meta/YouTube APIs) with token-bucket rate-limit throttling, webhook deduplication against replayed hooks, and exponential-backoff retries on render failures.
- Delivered a six-brand GoHighLevel implementation for an Australian tree-care group — 6 sub-accounts, Twilio SMS workflows, an AI receptionist, and a VAPI lead-qualification agent so after-hours calls are answered and routed instead of lost.
- Primary technical contact on agency accounts — requirement gathering, build, and rebuild documentation; also shipped finance/ops automation (invoice reconciliation, restock alerts) and multi-channel lead funnels.

PROJECTS

Telemedicine Booking Backend | *Fastify, TypeScript, PostgreSQL, Redis, BullMQ, Docker*

- 36 REST endpoints, 16 tables, 10 migrations; Postgres-durable idempotency layer with request fingerprinting and exact response replay.
- 3-step booking saga with compensating transactions guarded by row locks and a delayed recovery

job; AES-256-GCM field encryption with a rotatable key ring; OpenTelemetry + Prometheus instrumentation; GitHub Actions CI with live service containers.

AI-First CRM with LangGraph Agent | *FastAPI, LangGraph, Groq, React, Redux Toolkit*

- ReAct agent with 5 tools sharing the same CRUD layer as the REST API, so agent-driven and form-driven writes cannot diverge.
- Two-tier model routing (Llama 3.3 70B reasoning / 3.1 8B extraction) to cut cost and latency; layered 429 handling with SDK backoff, custom detection, and graceful degradation.

NEET/JEE Exam Platform | *Next.js 16, React 19, Prisma, PostgreSQL, Gemini*

- 17-model schema, server-derived exam timer immune to client tampering, polymorphic scoring engine with negative marking, streamed AI explanations that fall back to author solutions on API failure.

Civic Grievance Triage Platform | *Flask, Google Gemini, Google Maps*

- Trilingual (Bengali/Hindi/English) system, 22 routes; Gemini classification with a complete rule-based fallback (runs with zero API keys); explainable 0–100 urgency scoring; duplicate detection via geo-proximity + text similarity.

EDUCATION

B.Tech, Computer Science & Engineering — Techno International Newtown, Kolkata (MAKAUT) *(Expected May 2027)*

CGPA: 7.76/10 · Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Machine Learning, Image Processing

ACHIEVEMENTS

- **Smart India Hackathon 2025 — National Finalist (Hardware).** Team lead for Suryadut, a solar-powered de-watering system for mining; selected in the top 0.1% of 50,000+ teams.
- **AI For Bharat 2025 — Lead Developer, GramLink AI:** multilingual government scheme eligibility assistant.
- **EIBS 2025 — Lead Developer, Bond Buy:** blockchain bond tokenisation platform with SIP infrastructure on WeilChain.

INTERESTS

Competitive programming, distributed systems and backend reliability, agentic AI systems, hackathons, open source.
